### Hardware

- SiRF Atlas V Prozessor (664 MHz)
- Microsoft Windows CE .Net 6.0 Core
- Ca. 8,8 cm (3, 5") transfective display
- Resolution 480x800 Pixel
- 128 MB DDR2-RAM / 4 GB flash-memory
- Expandable memory via microSD (up to 32GB)

- Built-in rechargeable li-polymer 2.300mAh accu; Accu-runtime ca. 10-12h (depends on the intense of the background light)
- Splash water resistant (meets IPX5)
- Size (LxWxH): 11.14cm x 6.38cm x 2.1cm
- Weight (without mount): 139g

### Software

- Special outdoor navigation (OSM-maps onboard)
- Turn-by-Turn navigation including map und arrow on fields, forests, and hiking trails
- Turn instruction with switching from tripcomputer to map screen
- New routing after wrong turns
- Integrated, extensive tripcomputer incl. GPS-compass (all important data incl. graphic route course, height- and speed profile)
- Detailed track-recorder
- Export/Import of GPX-routes
- TEASI tour: Your destinations like a travel guide — create and share tours with POIs incl. descriptions and pictures

- 2 user-modes: Basic mode (full menu access) and Easy mode (easy menu structure)
- Adjustable profiles (walker, city bike, mountain bike, racing bike)
- Routing depending on the chosen profile (e.g. stairways for walkers or just tarred paths for racing bikes)
- Fitness function: time-, distance- and energy-consumption-dependent routing
- Community-upload (e.g. bikemap.net)
- Free memory on request (e.g. if the remaining memory is too less for running tasks)
- Storing the last 5 routes

#### In the box:

- GPS-device
- Mount for handlebar
- 220V USB-adapter
- USB data-/ charging cable
- Short user manual

EAN: 4260090615768  
Part-nr. 40-18-7453

Warranty / Service:  
36 months from buy-date consumer
